WildCodeSchool

1. Notifications

[EN] If you are annoyed by the audio notifications that you can receive on discord, there is multiple ways to mute them :

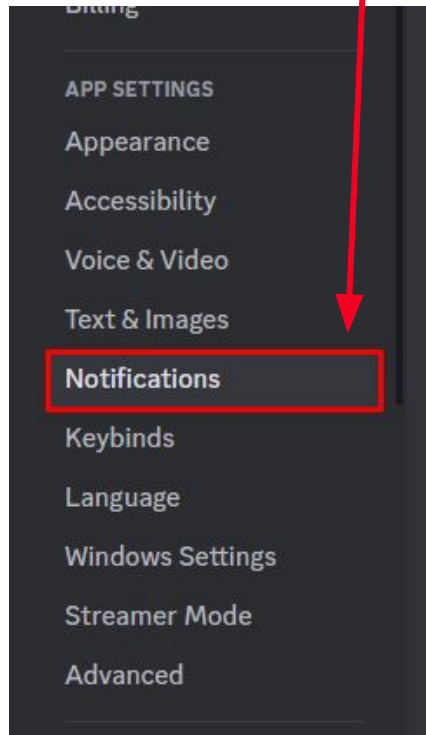

- Via discord settings
- Via the server properties
- Via the channel properties

[FR] Si vous êtes ennuyé par les notifications audio que vous recevez sur discord, il y a plusieurs façon de les mettre en sourdine :

- Via les paramètres discord
- Via les paramètres du serveur
- Via les paramètres d'un salon

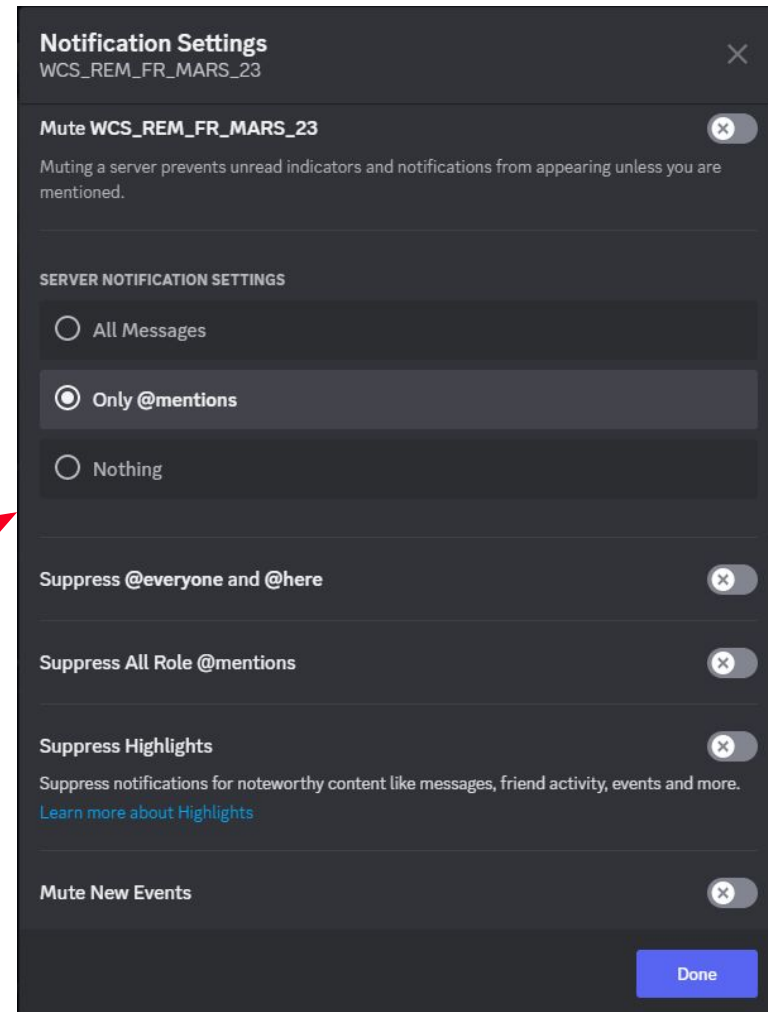

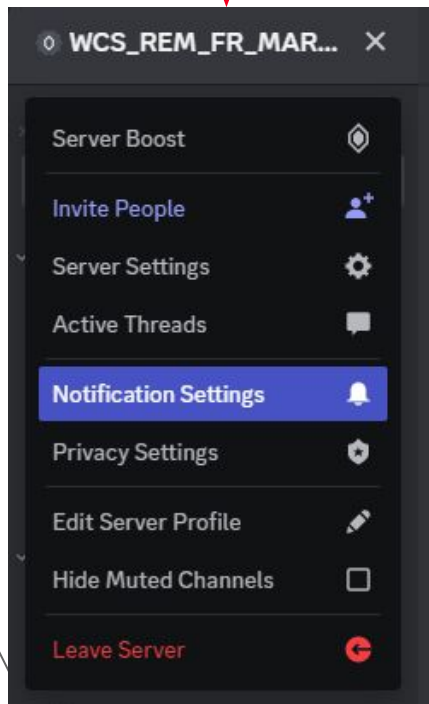

Discord settings

[EN] Under that **notification** tab you'll find a bunch of settings, be careful if you change something in here this will apply for everything on discord

[FR] Dans l'onglet **notification** vous allez avoir un grand nombre d'option, attention car celles-ci s'applique sur la totalité de discord

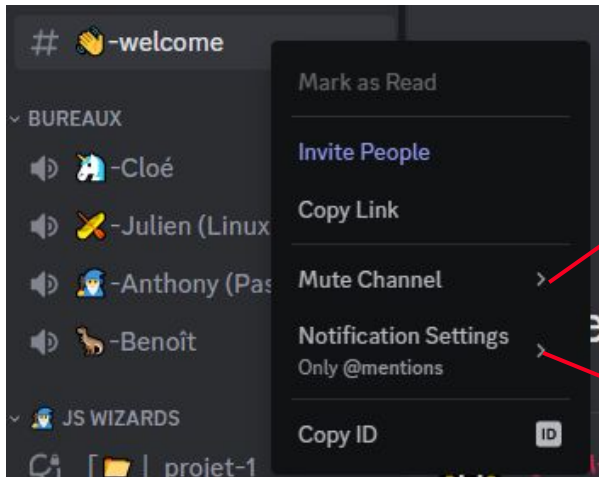

Server settings

Channel settings

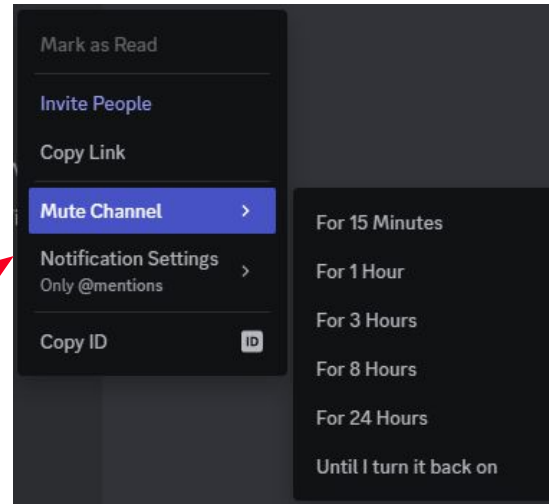

Right click on the channel you want

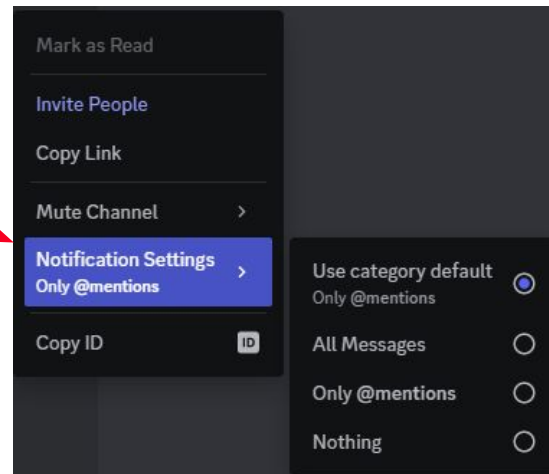

Click droit sur le salon que vous souhaitez

Option 1

Option 2

Channel settings

[EN] You can also modify the notifications settings via the **bell** located on the top right of your screen

[FR] Vous pouvez aussi modifier les paramètres des notifications via la **cloche** situé en haut à droite de votre écran

2. Tag system

[EN] An other way to notify someone or a group of people is to use the @everyone and @here tags :

@everyone will notify everyone on the server

@here will notify everyone that have access to the channel you post

In general it's not recommended to use these tags unless you have to share an important information with everyone.

[FR] Un autre moyen d'envoyer une notification à une personne ou un group est d'utiliser les tags @everyone et @here :

@everyone va notifier tout le monde sur le serveur

@here va notifier tout le monde qui a accès au salon sur lequel vous poster.

En général il n'est pas recommandé d'utiliser ces tags sauf si vous avez une information importante à communiquer

3. Pinned informations

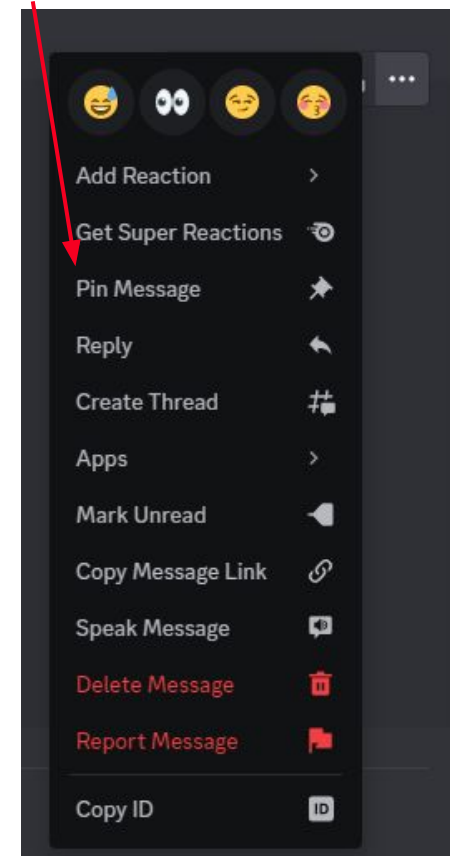

[EN] It can get “messy” in a channel and some useful information can end up hidden under the flow of discussion. It’s for that reason that it’s very recommended to check out the **pinned messages** or pin yourself important data which could be useful to others.

[FR] Un salon peut devenir “désorganisé” et certaines informations peuvent finir cachées dans le flux de la discussion. C’est pour cette raison qu’il est recommandé de vérifier les **messages épinglés** ou d’épingler vous-même des données importantes qui pourraient être utiles à d’autres.

Option 1 :
Check pinned
messages

Option 2 :
Pin a message

4. Search tool

[EN] You remember seeing some nice information or a specific message but you can't find it anymore ? The **search tool** will become quite nice to help you find it back.

[FR] Vous vous souvenez d'avoir vu une information ou un message spécifique mais vous n'arrivez pas à la retrouver ? La **fonction de recherche** va vous aider à le retrouver.

The image shows a screenshot of the Discord application interface. On the left, a dark-themed sidebar contains navigation icons: a server icon, a slash icon, a star icon, and a user icon. Below these is a 'Search' input field with a magnifying glass icon. A red arrow points from this search field to a dropdown menu on the right. The dropdown menu is titled 'Search' and lists various search filters under the heading 'SEARCH OPTIONS'. The filters include: 'from: user', 'mentions: user', 'has: link, embed or file', 'before: specific date', 'during: specific date', 'after: specific date', 'in: channel', and 'pinned: true or false'. A second red arrow points from the search bar area to the dropdown menu.

[EN] You will end up with different way to set your research as seen on the picture.

[FR] Vous aurez plusieurs façon d'effectuer votre recherche comme vous pouvez le voir sur l'image.

THANK YOU FOR READING

More questions ? Feel free to ask them to your colleagues on
discord.
